

OUR PARTNERS

Driving Excellence

Our goal at TNS Group is to provide high-quality services and products that best match our clients' needs. We accomplish that by partnering with industry-leading providers, companies who operate according to the same high standards of quality and integrity, and who can deliver expertise and cutting-edge solutions to the clients we serve.

VMware is the global leader in virtualization solutions. The TNS Group deploys VMware products to help businesses with scalability, security, and infrastructure management, increasing ease of network manageability as well as ROI.

Compellent is a leading provider of enterprise-class network storage solutions that are highly scalable, feature rich and designed to be easy to use and cost effective.

CA is one of the world's largest IT management software providers, helping to unify and simplify complex IT environments—in a secure way—across the enterprise for greater business results.

The TNS Group brings an end-to-end, cutting-edge consultative strategy, implementation and support experience for the entire Microsoft suite of products. We have been a longtime Microsoft Gold Certified Partner.

Fortinet is a pioneer in appliance-based, multi-threat security systems. We can implement a layered security solution incorporating Fortinet appliances as a perimeter defense for your network and users.

RSA is a premier provider of security solutions. Employing RSA technology, The TNS Group can provide a fully scalable security solution that integrates with your existing security protocols and infrastructure.

Citrix provides industry-leading remote access solutions, allowing remote users and satellite offices a secure, user friendly, and manageable conduit to their business networks. The TNS Group is a Citrix Gold Solution Provider.

Why Choose The TNS Group?

A Trusted Advisor

The TNS Group is committed to working in close partnership with its clients to identify their IT needs and together design the best, most cost-effective solution to meet those needs.

An IT and Business Point of View

The TNS Group understands that IT is not an island; we realize that all IT solutions must integrate—and integrate well—with every aspect of a client's business.

Best Of The Best

The TNS Group brings industry "best practices" to every client solution, combining optimal skill sets with cutting-edge technologies to ensure client success.

A Customized Solution

The TNS Group provides a wide range of IT solutions—each customized to the client's specific needs, budget considerations, and potential growth.

Simplifying Technology

The TNS Group delivers IT innovation and excellence to clients in a way that it is not only customized and effective, but practical and understandable.

Maximizing ROI

The TNS Group delivers IT innovation and excellence, optimizing your company's use of technology, while maximizing your return on investment.

Taking IT Further

Wherever you want technology to take you, we can show you the way. We're The TNS Group, a leading technology services company and a trusted advisor that can provide your business the technology and innovation it needs—and even make it simple! We'll collaborate with you to establish your business IT goals. Then we'll design and support a company-wide IT plan, emphasizing industry "best practices," while maximizing your company's ROI. With expertise in IT-managed services, broad resources and proven experience in consulting and outsourcing, we will help you to mobilize the right people, the right alliances, and the right technologies—to optimize your IT performance and ensure your long-term success.

OUR PRACTICE AREAS
Going Beyond

The TNS Group creates exceptional value for our customers by providing the highest quality IT services. Serving as a trusted advisor to our clients and bringing a wide range of innovative solutions, we are able to help our clients achieve substantial, lasting improvements in their technology performance.

Security & Privacy

Privacy specialists work with you to assess, plan, design, implement, and manage a security-rich environment to protect you, your systems, and your customers. An example of the offerings in this area are:

- ▶ Access Gateway
- ▶ Anti-virus Spyware & Spam Control
- ▶ Firewall Implementation
- ▶ Log Management
- ▶ Penetration Testing

- ▶ VPN Implementation

Business Continuity

Recently, there has been an increased focus on Business Continuity. We offer both technical and non-technical offerings in this area:

- ▶ Business Continuity Assessment
- ▶ Co-location
- ▶ Data Replication
- ▶ Disaster Recovery Design & Implementation
- ▶ ISP Aggregation & Redundancy
- ▶ Server Replication

IT Business Consulting

We can provide recruitment, management, and operation of personnel on behalf of a customer for all aspects of IT services. This can be done in conjunction with, or in lieu of, internal staff. Services in consulting are:

- ▶ IT Business Assessment
- ▶ LAN/Computer Room Consulting
- ▶ Service Agreement
- ▶ Staff Augmentation

Network Infrastructure

Our experienced specialists will provide the proper products, services, and resources to improve your IT systems. We take a "best practice" approach to our systems and network consulting services which includes:

- ▶ Active Directory Design, Migration & Upgrade
- ▶ Application Delivery
- ▶ Assessment, Architecture & Design
- ▶ Blackberry, PDA & Smartphone Integration
- ▶ Data Center Consolidation
- ▶ Desktop Managability & Security
- ▶ Desktop Upgrade & Deployment
- ▶ Exchange Design, Migration & Upgrade
- ▶ Microsoft Networking Services
- ▶ Network Health Check
- ▶ Performance Management
- ▶ Remote & Mobile Access Solutions
- ▶ SAN Architecture & Design
- ▶ Server Virtualization
- ▶ Tablet PC Implementation
- ▶ Technical Assessment
- ▶ Thin Client Technology
- ▶ Wireless Technology Services

Managed Services

For clients that want the convenience of off-loading the management of their systems, we offer:

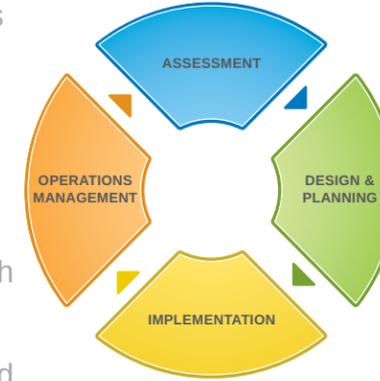

- ▶ Help Desk Services
- ▶ Managed Co-location Services
- ▶ Managed Data Centre Outsourcing
- ▶ Managed DR Replication
- ▶ Network Monitoring
- ▶ Network/Infrastructure Services
- ▶ Remote Administration
- ▶ Security Services

“ I continue to be impressed with The TNS Group’s ability to attract and retain a high caliber of technology and management experts to help me in just about every aspect of my position as Chief Information Officer of a large statewide organization. ”

— Masonicare, Inc.

OUR PROCESS
The Road to Improvement

The TNS Group delivery process ensures that each IT solution is crafted to meet the specific needs of the client and their unique environment—from initial needs assessment, through every stage of implementation. By applying a refined, time-tested methodology, we are able to design an appropriate solution based on the client’s precise needs, budgetary considerations, and industry best practices.

Assessment

The assessment phase provides a quick and accurate diagnosis of the current state of your IT environment, including components such as the infrastructure, security, and application environments. Additional considerations include appraisal of future needs, risk assessment, and the provisioning of a realistic map to help achieve business objectives.

Design and Planning

This phase encompasses the development of a technology architecture design, proof of concept, risk management strategy, and/or a detailed implementation plan. This effort requires highly specialized skill sets to accommodate new and emerging technologies to maximize efficiency and ROI associated with your IT environment.

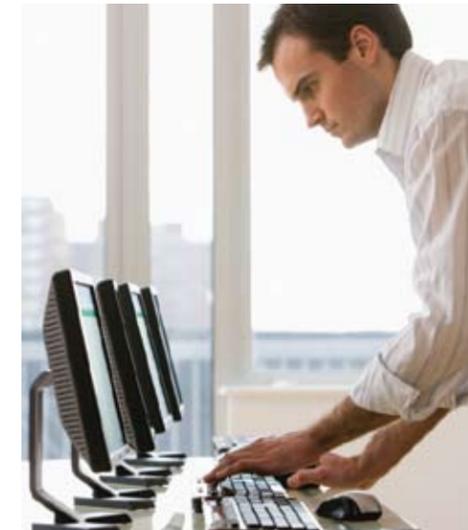

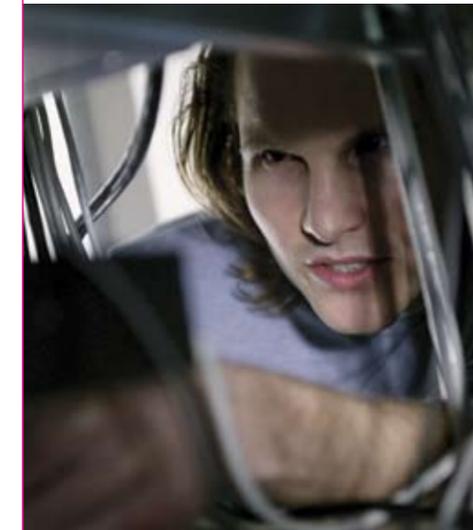

Implementation

The TNS Group aligns people, processes and systems for a timely and efficient planned implementation. By merging effective project management, superior skills and the appropriate technology, we ensures success.

Operations Management

The TNS Group delivers thorough project documentation including all troubleshooting and management procedures. A support framework is put into place and communicated to all end users.

From on-demand support, staff augmentation, to full managed services, we provide customized programs of preventative maintenance and repair. Support options can be customized to the individual needs of each client.

“ In a volatile industry such as the field of Information Technology, vendors can be just as volatile. I am very appreciative of the stability The TNS Group provides and for the relationship we have established. I highly recommend The TNS Group’s System as a service provider for IT support. ”

— Versus (a Comcast company)
